

Information:

This bookmark keeps track of where you should be to read the Book of Mormon in 6 months. There are slightly more days in the second half of the year (184 vs 181) and Leap Day doesn't figure in to the calculations.

The large numbers next to the month are the page number you should be on by the end of the month. The smaller numbers next to the multiples of seven are where you should be on that date (to help keep you on schedule if you happen to miss a day or two)

This page has a bookmark for both the first half and second half of the year, and the following two pages are for multiple bookmarks per page for each half respectively.
