

Pioneer Handcart Replica Assembly

1. If you want to clean the burn marks off the wood, do so before assembly using 320 grit sandpaper. When gluing, use wood glue or medium thick superglue.
2. Glue B on side of C.
3. Glue B/C to A1 making sure the tab Bb connects into notch Aa. It will be a tight fit.
4. Glue A2 to C on the opposite side of A1.
5. Glue D to the back of the cart
6. Glue the wheel setup to **one** side of the one of wooden rods as shown in diagram. Hubs to wheel, hubs and wheel to rod. Make sure not to get glue on the side where axle slides through the cart.
7. Slide rod through axle slots on part A1/A2 then glue the wheel on the opposite side in the same way as step 6.
8. Slide other rod through handle area in front and glue in place.
